<sup>1</sup> The Summary Level code identifies the records for each geographic summary level contained in that particular ASCII file. See Appendix ?? for the character positions of this field on each of these ASCII files.

<sup>2</sup> Data for Hawaii are included only in records for the United States Summary Level (010).

<sup>3</sup> To avoid disclosing confidential information, thirty-four places with a population of 100,000 or more do not appear in table21.dat to table24.dat. See Appendix 3 for a list of these places.
