¹ The values of the Summary Level variable (**sumlevel**) identifies the observations for each geographic summary level contained in that particular SAS dataset.

² Data for Hawaii are included only in observations for the United States Summary Level (010).

³ To avoid disclosing confidential information, thirty-four places with a population of 100,000 or more do not appear in table21.sas7bdat to table24.sas7bdat. See Appendix 3 for a list of these places.
